The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost, and current performance may be lower or higher than the performance quoted. Short term performance, in particular, is not a good indication of the fund's future performance, and an investment should not be made based solely on returns.

Fund holdings and sector allocations are subject to change and should not be considered a recommendation to buy or sell any security.

Mutual Fund investing involves risk. Principal loss is possible. Variable and floating rate securities provide for a periodic adjustment in the interest rate paid on the obligations. Fixed-income securities are or may be subject to interest rate, credit, liquidity, prepayment and extension risks. Interest rates may go up resulting in a decrease in the value of the fixed-income securities held by the Fund. High-yield fixed income securities or "junk bonds" are fixed-income securities held by the Fund that are rated below investment grade are subject to additional risk factors such as increased possibility of default, illiquidity of the security, and changes in value based on public perception of the issuer. The municipal market is volatile and can be significantly affected by adverse tax, legislative or political changes and the financial condition of the issuers of municipal securities. The Fund has limited operating history and there can be no assurance that the Fund will grow to or maintain an economically viable size.

Bloomberg High Yield Municipal Bond Index: The US Municipal Index covers the high yield portion of the USD-denominated long-term tax exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds, and pre-refunded bonds.

Credit Rating: A private independent rating service evaluates a bond issuer's financial strength, or its ability to pay a bond's principal and interest in a timely fashion. Ratings are expressed as letters ranging from "AAA", which is the highest grade, to "D", which is the lowest grade. In limited situations when the rating agency has not issued a formal rating, the rating agency will classify the security as non rated.

Weighted Average Maturity is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each bond's effective maturity by the market value of the security.

Duration is a time measure of a bond's interest-rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder. The longer a fund's duration, the more sensitive the fund is to shifts in interest rates.

Current Yield is the latest monthly dividend rate times 12 divided by the latest month-end NAV.
