

PRINCIPAL STREET HIGH-INCOME MUNICIPAL FUND

Q4 2023

INVESTMENT OBJECTIVES

The Fund's primary investment objective is to provide current income exempt from regular federal income tax. The Fund's secondary investment objective is to seek total return.

INVESTMENT STRATEGY

Delivering long-term, yield-driven total return relying mostly on fundamental credit analysis. Building a diversified high-yield portfolio focusing on overlooked and under-appreciated sectors of the high-yield municipal bond market.

PORTFOLIO MANAGEMENT

Portfolio managers Troy Willis, J.D., CFA®, and Charlie Pulire, CFA® lead the Municipal Bond Strategies Team. Joe Gulli is Director of Credit Research.

Portfolio Management team inception 3/1/21.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost, and current performance may be lower or higher than the performance quoted. Short term performance is not a good indication of the fund's future performance, and an investment should not be made based solely on returns. For performance current to the most-recent month end please visit: www.principalstreetfunds.com.

Class A shares are subject to a maximum front-end sales load of 2.25%. Performance without load would be lower if a sales load was reflected.

Must be preceded or accompanied by a current prospectus. Principal Street Partners is the Investment Adviser to the Principal Street High Income Municipal Fund, which is distributed by Quasar Distributors, LLC.

CREDIT PROFILE (%)

A- or HIGHER	11.1
BBB- to BBB+	8.8
C- to BB+	80.1
TOTAL	100
NON-RATED	94.7

Credit quality distribution is determined from the highest available credit rating from a NRSRO, such as S&P or Moody's, or assigned internal ratings. Non-rated indicates that no NRSRO has assigned these securities a rating and only an internal rating has been assigned.

Fund holdings and sector allocations are subject to change and should not be considered a recommendation to buy or sell any security.

Mutual Fund investing involves risk. Principal loss is possible. Variable and floating rate securities provide for a periodic adjustment in the interest rate paid on the obligations. Fixed-income securities are or may be subject to interest rate, credit, liquidity, prepayment and extension risks. Interest rates may go up resulting in a decrease in the value of the fixed-income securities held by the Fund. High-yield fixed income securities or "junk bonds" are fixed-income securities held by the Fund that are rated below investment grade and are subject to additional risk factors such as increased possibility of default, illiquidity of the security, and changes in value based on public perception of the issuer. The municipal market is volatile and can be significantly affected by adverse tax, legislative or political changes and the financial condition of the issuers of municipal securities. The Fund has limited operating history and there can be no assurance that the Fund will grow to or maintain an economically viable size.

Bloomberg High-Yield Municipal Index: The US Municipal Index covers the high yield portion of the USD-denominated long-term tax-exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds, and pre-refunded bonds.

Credit Rating: A Nationally Recognized Statistical Ratings Organization (NRSRO) evaluates a bond issuer's financial strength, or its ability to pay a bond's principal and interest in a timely fashion. Ratings are expressed as letters ranging from "AAA," which is the highest grade, to "D", which is the lowest grade. In limited situations when the rating agency has not issued a formal rating, the rating agency will classify the security as non-rated.

Duration is a time measure of a bond's interest-rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder. The longer a fund's duration, the more sensitive the fund is to shifts in interest rates.

Distribution Yield is the latest monthly dividend rate times 12 divided by the latest month-end NAV.
